“MTCU will be providing the Local Boards with aggregate Employment Ontario data reports at the beginning of June as an input in to local planning. The Local Boards will utilize these data reports to validate local workforce characteristics and client outcomes in the local area. The data may help to identify potential gaps or duplication in service and provide insight into better engaging underrepresented groups.”

“This online Farmers’ Market is a great idea. We think it would go over well in this area and we would definitely like to participate in this venture. The ability to set our inventory amounts will really help us contribute to local food sales.”
Maureen Andersen, Northern Buffalo Ranch

Trades in Ontario

The Ontario College of Trades currently regulates 156 skilled trades, of which 22 are compulsory, meaning only certified (licensed) workers, journeypersons, journeyperson candidates or registered apprentices can work in that trade. “Various reports have emerged across the country as to what is happening in the labour market. Some reports have concluded that Canada is facing a skills shortage, while others are calling it a mismatch and that projected jobs are region specific. To better understand what is happening in northern Ontario, six workforce planning boards from across the north are calling on local employers to help identify their labour market needs through the Employer One survey.

While employers in the north have participated in numerous partnership projects and sector-specific research with local planning boards, the Employer One project is taking it one step further. Employers across northern Ontario will be asked about the current and projected needs of their business, the demographics of their workforce, projected human resource vacancies, recruitment strategies and challenges, their perspective on candidate skills, education and training, top competencies needed in their business, and any ongoing concerns.”
